10 Unique Aspects: USA & UNHRC

- 1. Deep Dive via UPR with High Expectations:** The U.S. approaches each Universal Periodic Review (UPR) with strong submissions from both NGOs and the government. However, organizations like Human Rights Watch and Amnesty International have pointed out that the implementation of recommendations has been rather slow.
- 2. Academic Freedom and Campus Speech Debates:** Experts from the OHCHR have raised alarms about the increasing suppression of peaceful assembly and free speech on college campuses across the U.S.—a rather unusual focus on domestic issues.

3. **Systemic Abuse in Law Enforcement:** Persistent problems such as police torture in Chicago and the widespread issue of mass incarceration are highlighted in the UN's thematic review, which focuses on accountability, prisons, and racial bias.
 4. **Surveillance and Constitutional Threats:** The current political and legal landscape in the U.S., particularly with Project 2025, raises significant concerns about civil liberties—something that has been highlighted by Human Rights Watch and various data-driven reports.
 5. **Democratic Backsliding Concerns:** Freedom House and the Washington Post highlight a concerning trend, showing a transition from “free” to “flawed democracy.” This shift comes with a noticeable drop in trust in our electoral systems—making the HRC narrative all the more crucial.
 6. **Child Labor and Indigenous Justice Focus:** The joint submissions from HRW and ACLU to the UPR shine a light on critical issues like child labor and the rights of Indigenous peoples regarding their land—topics that are emphasized within the UN's thematic priorities.
 7. **Strength of U.S. Civil Society:** The ACLU, Human Rights Watch, and Amnesty International play a crucial role in shaping the discussions around the Universal Periodic Review (UPR) and the Human Rights Council (HRC) through their oral statements and submissions—showcasing their unmatched influence as NGOs.
 8. **OHCHR Special Rapporteur Involvement:** Visits from SRs on torture and assembly suggest intense international monitoring of events like protests and prisons.
 9. **Global Role vs Domestic Credibility:** As a prominent member of the UN Human Rights Council, the U.S. is facing more scrutiny regarding its international advocacy for human rights, especially given the challenges it faces at home.
 10. **Institutional Transparency Under Challenge:** Reports point to purging critical material from State Dept. HR Reports, raising questions about U.S. transparency in Council processes.
